

Case # 1:18-cr-58

The Honorable: Liam O'Grady,

My name is Chennor Marley Bah and I am writing you this letter because the conditions in my unit has worsen, and it seems to get worse by the day. As of right now there are 10 active cases with the guys in my unit. The prison staff is not removing the guys with the active cases out of the unit, they are just being left in their cells to quarantine. The virus is traveling through the ventilation system. As one of the nurses just informed me (P.A. Lecure) the BOP is not authorizing mass testing of inmates unless conditions are worse. This is an outbreak in my unit, how worse does it have to get? Does someone have to die first in my unit before they take the proper precaution to ensure our safety. There are guys in my unit that are sick with the virus but won't report their symptoms, so that makes the situation even more dire because now we do not know who has it and who doesn't, but without the BOP testing us there is no way to slow the spread of the virus. I suffer from Hep B virus that is uncurable which makes me even more susceptible to death if I contract the covid-19 virus. The BOP hasn't given us any PPE except for masks which hasn't been changed out in months. It's bad in here your honor. Please consider my motion to Reconsider Compassionate Release. I was sentenced to 120 months which was a mandatory min. I was sentenced to time not death by a deadly disease. Thank you for your time and patience.

Chennor Marley Bah
